Auto Leasing

Imagine if you could simplify auto leasing...

Leasing is simply another form of financing. Instead of paying for the whole vehicle, you are paying for the depreciation and financing costs only. What's left at the end is called the residual value but it's really just a forecasted value of what the vehicle will be worth at the end of the lease term.

Why use Atticus instead of leasing directly from a dealer?

We have vehicle-leasing experts who can guide you through the maze, helping you to objectively compare your options. In addition to having access to our fleet volume buying power, you can save time by having us arrange everything for you.

- * Any brand
- * New or used
- * Open and closed-end leases
- * Personal vehicles or fleets

It's simple, really.

You have nothing to lose because we can choose from the manufacturer's leasing plans or from a variety of other plans – whichever is the best for you and since our fees are typically paid by the lessor (lender), it doesn't cost you more to use our services.
